Re: Mining and Reclamation Plan for Devils Slide
Quarry - ACT/029/001

Gentlemen:

Attached is MR Form 8, 3-page letter to comply with the new Rule M-10 Reclamation Standards as interpreted by Ideal. Since filing the "Notice of Intent to Commence Mining Operations", June 1977, Ideal has discontinued disposal of plant refuse (part of the plant electrical precipitator catch) behind a small dam located between quarry 2 and 3 ridges. This is explained further on the MR Form 8 letter items M-10 (9) and (13). In order to include the new area for disposal of this material, please add 6 acres to total affected land suggested in the Notice of Intent, increasing this figure from 264 to 270 acres.

Sincerely,

W. H. Lower
Plant Manager

Encl.
